Dear Jainil,

I have carefully reviewed your email regarding the internal marks.

Please note that your evaluation has been carried out fairly and in accordance with the defined academic criteria. The assessment is not based solely on the final project outcome but on multiple parameters, including the student's daily work, regularity, project report quality, and weekly report submissions.

It is important to highlight that your submission and overall engagement did not fully meet the expected timelines and consistency requirements, which has been considered during evaluation.

Additionally, comparison with other students is not an appropriate basis for reassessment. Each student is evaluated individually based on their own performance and adherence to the prescribed criteria. Still, if you have any query, you can meet me before 3:00 PM today.

**Thanks & Regards,
Prof. Chintan Rana,
Assistant Professor,
Department of Computer Science & Engineering,
Sal Institute of Technology & Engineering Research,
Sal Education Campus - Ahmedabad.**

Respected Mr. Chintan Rana Sir,

I hope this message finds you well.

I am Jainil Ramkumar Gupta (Enrollment No. 220670132018), BE ICT – Semester 8. I am writing formally to request a review of my internal marks for Subject Code 3183201 (Internship/Project), for which I have been awarded 68 out of 100.

I have reviewed my marks through the GTU student portal as per the circular (Ref No: GTU/BE/MarkEntry/S26/3255, dated 7-05-2026). As the institute has a window to update and relock marks from 19-05-2026 to 21-05-2026, I am bringing this to your attention urgently and respectfully.

MY PROJECT DELIVERABLES (All submitted on time)

-
- Project: "AI-Powered Border Surveillance System with Real-Time Anomaly Detection"
 - Custom YOLOv8 model — 5 days of training — mAP50 improved 124% (0.213 → 0.478)
 - Dual-stage ML pipeline: Isolation Forest + Random Forest anomaly detection
 - Real Microsoft Azure cloud integration: Blob Storage + Cosmos DB (HTTP 201 confirmed)
 - Live Streamlit command center dashboard with geographic threat mapping
 - Automated email alerting via SendGrid API
 - 285 automated pytest unit tests across 6 modules
 - GitHub Actions CI/CD pipeline — professional software engineering standard
 - GTU project portal status: "Completed" — dated 1st May 2026
 - Zero late submissions — everything delivered within the prescribed timeline
-

BATCH-LEVEL EVALUATION INCONSISTENCY

Sir, I want to respectfully highlight a concern regarding evaluation consistency across the batch. The batch of 39 students has been divided among 3 internal guides. The overall batch statistics (as visible on the GTU marks portal) are as follows:

- Batch Average: 80.67 / 100
- Highest Mark: 92 / 100
- Lowest Mark: 60 / 100
- Students scoring 75 and above (A+ or O grade): 35 out of 39 students
- Students scoring below 70: only 4 students in the entire batch

I have been awarded 68, placing me among the bottom 4 students of the entire batch of 39. This does not reflect the complexity, completeness, or quality of my project when compared against the batch as a whole.

To be specific — students in this same batch who submitted significantly simpler projects (such as basic Power BI dashboards without any ML model, cloud integration, or automated testing) have received marks in the range of 85 and above. I am not questioning those students' efforts — I am questioning whether the same evaluation standard was applied consistently across all 3 internal guides.

A fair and minimum expected mark for my project — given its technical depth, on-time submission, working deployed system, real cloud integration, 285 tests, and an industry certification — should be at least 88-92 out of 100, which would still be below the O grade threshold of 91.

I am not asking for special treatment. I am asking for fair and consistent evaluation.

REQUEST

I respectfully request you to:

1. Review my submitted report, PPT, and project deliverables once more
2. Consider revising my internal marks before the GTU relock deadline of 21-05-2026
3. If needed, I am available to give a live demonstration of the fully working system at your convenience

I am attaching the following evidence with this email:

- GTU Project Portal Completion Certificate (dated 1st May 2026)
- GitHub Actions CI/CD screenshot (285 tests passing)
- Azure Blob Storage upload confirmation screenshot

Sir, I have invested extraordinary effort in this project and I trust in your sense of fairness. I look forward to your response at the earliest given the tight GTU deadline.

Respectfully yours,

Jainil Ramkumar Gupta
